

ALI PANEL SECTIONAL DOOR

If you're looking for a garage door with contemporary appeal, then the Ali panel door is for you. Assembled with powder coated aluminium frame and lightweight aluminium composite panels (ACP), the ali panel door is weather and UV resistant, easy to clean and highly durable ensuring longevity and minimal maintenance for many years to come. To maximise your houses' impression and to achieve that 'integrated' look, the negative detail between the panels can be lined up to match joints between lining boards on the eaves or façade of the building.

A standard frame is manufactured from Door Smart WA's uniquely designed aluminium extrusion, for the ultimate in quiet and smooth operation.
