

CLEAR LITE SECTIONAL DOORS

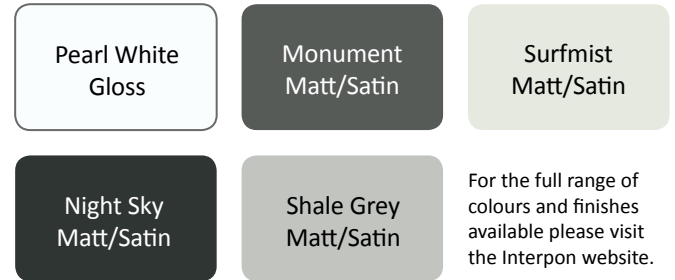

Sick of turning on the light every time you go into the garage? Not only is a clear lite door the solution for those wishing to allow natural light in it is also highly durable ensuring longevity and minimal maintenance for your garage door. Assembled with powder coated aluminium frame and lightweight twin wall polycarbonate panels the clear lite door is weather-resistant, easy to clean and comes with the option of extra solar protection. Added solar protection will block harmful UV radiation out of your garage space safeguarding any valuable objects that may be stored. It is available in clear with up to 90% light transmission (same as glass), tinted and coloured options. Some popular choices of tint and powder coat colour options are outlined below.

A standard frame is manufactured from Door Smart WA's uniquely designed aluminium extrusion, for the ultimate in quiet and smooth operation.
